## Boys Band Organizes.

A meeting was held at the High School on Monday evening for the purpose of organizing a band. It was decided to name the organization "The Didsbury Boys' Band."

The following officers were duly elected:

President, Mr. E. G. Ranton. Vice-President, Mr. G. Ashhead. Sec.-Treas., Mr. C. R. Ford. Musical Director, Dr. Liesemer. Executive: Rev. A. J. Mitchell, Rev. H. J. Wood, Messrs. H. W. Chambers and J. E. Gooder.

A committee comprising Messrs. C. R. Ford, C. Ashhead and Rev. A. J. Mitchell, was appointed to approach the town council with regard to a grant towards repairing instruments and obtaining music.

Mr. C. R. Ford reported that 21 instruments are now available and 14 adults and about 18 boys have intimated their desire to join the band.

Another public meeting will be held at the school Tuesday July 4th when all interested are asked to attend. Parents of boys who intend joining the band are especially invited.

## I.O.D.E. Notes.

Mons Chapter met at the home of Mrs. Ward Keith on Monday June 26th for the final meeting before the summer recess. Many activities for the autumn were arranged.

The Regent gave a most comprehensive outline of the National Chapter proceedings in Edmonton. Mrs. Hugst, whom the chapter is delighted to have among them again also spoke, both very briefly and very humorously.

## Camp Meeting.

The annual camp meeting of the M.B.C. Church will open on Friday July 7th and continue to July 16th. The evangelists, Gordon Wishart and his wife will be the principal speakers, and Rev. C. J. Hallman will be in charge.

## Gone Are the "Wee Sma' Hours."

When in future we have occasion to report on dances we will be compelled to omit the usual comment, "dancing was enjoyed until the wee sma' hours," as according to instructions received by all detachments, K Division, Royal Canadian Mounted Police, all dance halls must close at 1 a. m. The following are the new regulations now effective:

"In any entertainment hall where dances are held, dancing is prohibited and shall not be permitted between midnight on each Saturday and 8 o'clock a. m. of the following Monday, and between 1 o'clock a. m. and 8 o'clock a. m. on each Tuesday, Wednesday, Thursday and Friday."

"Minors under 18 years of age shall not be admitted to an entertainment hall where public dances are held, unless accompanied by parent or guardian."

## Carstairs Stampede.

All roads lead to Carstairs next Wednesday—July 5th for Carstairs' 5th big stampede, which is being held under the auspices of the old timers of the district.

A full day's program of sports, athletic events, baseball and stampede events will be pulled off.

Commencing with a monster street parade at 10 a. m. there will not be one dull moment, as the committee has arranged for some of the best riders and worst horses in the west.

On the midway there will be a number of new games and the usual hot-leg and refreshment booths.

As a fitting climax to this big frontier celebration, Hopkin's Old Time Orchestra will supply the music for the biggest dance of the year, which will be held at night.

Mark the date, Wednesday, July 5th on your calendar and plan to be in Carstairs next week.

Admission: Adults 50c., school children free. Cars free.

George Rydys spent Monday in Calgary.

## LOCAL & GENERAL

Miss Mae Rydys, of Ranton's, is taking her vacation and is visiting relatives at Moose Jaw, Sask.

Mrs. Bellamy, Mrs. Eubank and Mr. John Eubank are visiting with friends and relatives in Edmonton.

J. V. Berscht has brightened up the front of his store with a coat of paint. Mr. H. D. Booker did the work.

See your old friends George Sidney and Charlie Murray in "The Cohens and Kellys in Trouble," at the Opera House tonight, Thursday.

A dance will be held at Community Hall on Friday July 7th. The Hammers' Orchestra, of Olds will supply the music.

The subject of the sermon at Zion Evangelical Church Sunday morning will be "Going On Unto Perfection." In the evening the Sunday school will give its annual Children's Day program.

Miss Dorothy Tuggle, of the Royal Alexander Hospital, Edmonton, who has been spending a three weeks' vacation with her parents, Mr. and Mrs. J. L. Tuggle, returned to her duties on Tuesday.

Ronald Thomas, son of Mr. J. D. Thomas, who was sent by the local C. F. A. to take a 10-day short course in agriculture at the University of Alberta, returned home last Wednesday.

Miss W. Terry has resigned her position as matron of the Didsbury Hospital on account of her health. Her position has temporarily been taken by Mrs. Archie Boyce, of Carstairs. It will be remembered that Mrs. Boyce was formerly matron at the hospital. Miss Terry left on Tuesday for a short vacation at Sylvan Lake and will then reside in Calgary.

Knox United Sunday school and congregational picnic will be held on Saturday July 1st. Cars will meet at the Church at 11 a. m. and after loading up will proceed to the picnic grounds—Vogel's farm, west of Carstairs. Those attending please bring lunch baskets, also cup, spoon and plate if needed. Any members or friends of the congregation having cars available please communicate with Messrs. J. Boorman or Ormond Phillipson.

Berscht's have just received a shipment of celanese dresses at \$2.25. Ask to see them.

## Mr. W. Aberhart On "Douglas System"

The Opera House was crowded to capacity Friday evening, when Mr. Wm. Aberhart, of Calgary spoke on "The Douglas System."

Mr. H. W. Chambers occupied the chair and a short address was given by Mr. Manning, of Calgary.

Mr. Aberhart, with the aid of charts, outlined the workings of the Douglas System.

He said that the present economic system was decadent and designed for an age of scarcity, which provided plenty of work for man's needs. With the advent of modern machinery we were now living in an age of plenty, and the over-production of goods had been the cause of unemployment and lessened the ability of consumers to buy the goods produced.

He claimed that under the Douglas Plan a continuous flow of credit would be provided so that a market at the cost of production could be found for all goods produced. The system would provide that basic dividends of credit be given to all citizens to provide the necessities of life. Wages, salaries and commissions would be paid by credit issued by a provincial credit house, and no hoarding could be allowed.

Mr. Aberhart claimed that these factors could be introduced without any great upheaval of social, political or commercial interests and that business would take on a new lease of life, that increased consumption would call for more production, and that meant more employment.

An organization was formed to foster the movement in Didsbury, with Mr. John Liesemer as president and Mr. W. R. Hall as secretary.

Billy Moon has "spudded-in" a new well for the Club Lunch.

## Teachers Re-Engaged.

At the school board meeting on Monday afternoon all the present staff of teachers was re-engaged.

The schedule of salaries was placed as follows:

High School: Principal \$1,700; 1st Assistant \$1,350; 2nd Assistant \$1,240.

Public School: Principal \$1,250; Grades 5 and 6 \$925; Grades 4 and 5 \$850; Grades 2 and 3 \$825, and Primary \$1,190.

## Obituary.

Mr. Frank Jahnske passed away at his home in the Zella district on Tuesday, June 29th 1933 after a short illness.

The funeral service was held at the United Church, Didsbury on Thursday afternoon June 22nd. Rev. A. J. Mitchell officiating. Interment took place at the Didsbury cemetery.

Frank Jahnske was 52 years of age and was born in Butler County, Iowa. In 1906 he was married to Emma Mae Waddingham at Klemme, Iowa. They moved to Didsbury in 1912 and purchased a farm in the Zella district, where they have since resided.

He is survived by five daughters, Mrs. V. Eganis, Ethel, Esther, Eca and Mildred; three sons, Charles, Wilbur, Fred, and four grandchildren, all of Didsbury. Also his father, one brother and a sister in the United States.

Mr. Jahnske was highly respected by the whole community, who deeply regret his passing.

Messrs. W. A. Austin and J. E. Gooder are attending the convention of Union of Alberta Municipalities being held at Calgary.

## Vacation Days.

Schools all over this western land will soon close their doors for the summer months and tens of thousands of boys and girls will joyfully welcome the holidays.

In offices and shops week with week employers and employees will for longer or shorter periods relinquish their tasks to enjoy their hard earned summer vacation.

Work on the farms will ease up a bit following Spring activities and during the period while the crops grow and ripen for the harvest.

In a word, Western Canada's short holiday period is at hand.

It is a time to forget, as far as the holidays are possible, the worries and difficulties of the months of depression, and for the younger generation in particular every reasonable effort should be made to make the next two or three months as happy and health-giving as possible, with life lived largely in the open.

There will not be much money to spend, and vacation plans will have to be made upon a cheap scale by most people, but that is no reason why these holidays should not be just as enjoyable as if planned in a much more elaborate and expensive way.

Long journeys may be out of the question, but fortunately Western Canada has been blessed by nature with an abundance and variety of lovely summer resorts and camp sites which can be reached easily and at little expense, and where the daily cost of living is extremely low. Such a vacation will serve to remove the strain and worry of school studies and exams, which youth has been undergoing, and blow away the fogs of the depression in which all people, young and old, have been living. It will mean renewed mental and physical vigor.

Fortunately, too, in this year when money is not a plentiful article wherewith to make trips to other Provinces or countries, opportunity is being afforded right in the heart of Western Canada for a holiday which combines all the essentials of an enjoyable, worthwhile respite from daily toil—a holiday that will provide relaxation, entertainment and thrills combined with educational features and opportunities never before offered in this Western country, and all at small expense.

Reference is to the World's Grain Exhibition and Conference to be held at Regina during the last week of July and the first week of August. This will be a truly wonderful exhibition, a magnificent enterprise. Over forty nations, states and provinces will be represented in the specially constructed quarters of a million dollar building, having a floor space of 148,000 square feet, and actually miles of exhibits. It will be not only a sight worth seeing, but a great education.

A vacation visit to this great exhibition, which will be the result of three years of intensive preparation, will not be a costly one. For the people of the prairie provinces, the distance to be travelled is short, and specially low rates on the railways will make the journey within reach of most people, even in these days of restricted finances. A huge city of tents will be built adjacent to the exhibition grounds, with modern facilities provided, where groups and families can stay at the very minimum of expense, and will constitute an ideal outing for motor parties from all over the land.

Western Canadians, old and young, need not deny themselves a real and enjoyable vacation this summer. They owe it to themselves to take all the enjoyment and recreation they can from the opportunities afforded them. They will be better for it, and the spending of a lazy time at some Midway's Heart and Nerve Pills. I purchased a box and got such relief I will gladly recommend them to all who are troubled as I was."

So, take a holiday. Pack the family in the old car and hike away to some new scene. Live in the open, rambling over the country side. Go fishing. Let the boys and girls paddle and swim, enjoy out-of-doors games, gather around the bonfire at night for an old time sing-song. Everybody will be the better for it.

## Burning Ten Million Yearly

Figure Given As Forest-Fire Loss In Canada

Figures compiled by the Forest Service of the Department of the Interior show that the annual forest-fire loss in Canada for the ten year period 1922-31 was \$10,000,000. It is something that appeals, Canada's forests are among the richest of her heritages, and the fact that we, the trustees of that heritage, should be sending it up in smoke at the rate of \$10,000,000 a year, is a blot upon our capacity as a people. The melancholy aspect of it all is that most of this fire-loss is the result of indifference, of a carelessness that will not heed warning or educational propaganda. We talk loudly about the exploitation of promoters and about the failures of the newspaper industry, yet all the time we permit or cause a condition which is doing more to ruin our forests than all the capitalists and greedy promoters combined. It is one of the discreditable things in our whole scheme of national economy.—Ottawa Journal.

## NURSE LOSES 7 LBS.

"I weighed 145 lbs.," writes a nurse, "when I bought the bottle of Kruschen Salts which I have just finished. I have lost a good half-teaspoonful in a glass of hot water every morning. Now I weigh 138 lbs., a loss of 7 lbs. I am very glad to have lost weight, especially without trouble."—M.H.R. (Trained Nurse). Unlike most salts, Kruschen isn't simply a laxative. When you take Kruschen Salts you not only stimulate your liver and kidneys to function naturally and perfectly, but you supply every internal organ, gland, nerve and fibre in the body with Nature's own re-vitalizing and rejuvenating minerals. Get a bottle of Kruschen Salts today, and take one-half a teaspoon in a glass of hot water every morning before breakfast. Before the bottle is empty you'll feel years younger—eyes will brighten—step grow sprightlier—nerves steadier—you'll sleep sound, enjoy your meals, and after a hard day's work you'll be ready for wholesome recreation—one million women already know all this.

## World Meat Reserve

Experts Believe Reindeer Will Add Greatly To Supply

Experts believe that a great world meat reserve can be established in northern Canada, and that the millions of acres hitherto regarded as waste land will give the empire a useful and cheap addition to its meat supply. They expect that a vast business organization with a cold storage plant and transport installations will result from the successful migration of a large herd of Alaskan reindeer. When the herd has developed sufficiently, tinned reindeer meat and reindeer tongue—held to be a great delicacy—will be exported. The animals will be of the greatest use, as they provide their own food, even in mid-winter. They are generally regarded as the most widely versatile animals in the world.

## Turks Eat Little Meat

Quantities Of Rice, Bread, and Fish Constitute Meal

One of the best ways of getting to know a man or a nation is to study what he eats. The inhabitant of Constantinople is a big bread eater and a tremendous rice eater. Strangely enough, considering what a fighter he is, he does not go to a forest very much. He will devour at a single sitting huge quantities of baked corn, Indian corn, stewed barley, haricot beans, lentils, and aubergines. He cooks in olive oil and will eat fish of any freshness—just out of the sea or in the last stages of decomposition.

## What He Wanted

"I don't know about granting you another divorce, Jake," the judge said. "You've had three already and if I grant you another you'll simply go and get married again."

"Oh, no, judge your honor," Jake protested. "I ain't agin' on that tall—I jes' wants you to put me out of circulation."

"Did you sleep well, sir?" "Wonderful! You remember I dreamed the night before last that somebody gave me a bad \$5 note? Well, last night I managed to spend

## Background For Exhibit

Map Of Canada Will Be Flood-Lighted At Chicago Exposition

History was made in Montreal when Gordon Hammond, internationally famous scenic artist, saw his latest effort, the largest map in the world, a map of Canada in colors, 39 by 130 feet, leave for the Century of Progress Exposition in Chicago where it will hang, framed and flood-lighted, as a back-taking background for the Canadian exhibit in the great hall of the travel and transport building, in which the Dominion Government, the Canadian Pacific and the Canadian National Railways are participating.

The Canadian coat of arms in color, measuring approximately seven by eight feet and surrounded by the word "Canada" in huge cut-out letters, will hang from the centre of the map at the top and constitutes another record achievement in that it is the largest photographic enlargement made to date in the Dominion. The third record is that the complete map, models, dioramas, etc., have been completed in about three weeks, when ordinarily the job would have taken three months. The result has been a real triumph for Canadian artists, Canadian material and Canadian methods.

The huge map, of course, will be the main attraction, containing as it does farming and mining areas, national parks, both trans-continental railway systems on general lines, principal resorts and cities, and three large cartouches or inserts in which information concerning Canada as a land of opportunity for industry or tourists, is presented in condensed form. Its message is easy to grasp. Its huge size immediately impresses one with the vastness of the Dominion, and as one stands back from it, it is then that Mr. Hammond's ability becomes evident. One has the sense of being high above the earth looking down at a scene stretching from the Aleutian Islands in Behring's Seas to Iceland and from the Arctic to Southern Illinois, in which every detail appears.

## Solves One Problem

New York Church Replaces Choir With Record Music

The problem of maintaining a choir when economic conditions prohibit has been solved by the Presbyterian Church of the Convent at New York.

Photograph records of choir singing are played and amplified at the Sunday evening services. The congregation sings to the accompaniment of electrical transcriptions of the choir music from famous churches all over the world. It has been contended more elaborate programmes can be offered than it could present with its own reduced choir.

Employer: "You are, I suppose, strictly honest?" Applicant For Office Boy's Job: "Yes, sir, but at the same time I understand that business is business!"

Nearly ten million narcissus bulbs were grown in British Columbia in 1931, while an equal number of bulbs of other species were also grown for the domestic market.

Clever Machine Discovered In Britain To Defraud Government

Infra-red ray, the remarkable scientific discovery which enables the camera to penetrate fog and darkness, has been the means of unmasking an astonishingly elaborate fraud on the inland revenue.

It is understood that Scotland Yard has been investigating the matter secretly for many months past, and the case has become evident that many thousands of pounds are involved.

The conspiracy to cheat the exchequer has been worked with complete success for years by a clever gang, who have found a means of obliterating the cancellation marks on the stamps issued by the post office for the payment of income tax.

Thousands of the stamped cards tendered by weekly wage-earners in payment of income tax have apparently been obtained by some means.

The stamps have been steamed off, subjected to a cleaning process which has removed every mark of cancellation, and then sold at half their original face value.

The inland revenue authorities had not the slightest cause for suspicion until months ago, when someone noticed that the stamps had peeled off the backs of the cards sent to Somerset House.

It was at first surmised that the gunmaker must be at fault. The cards and the stamps were sent to the firm concerned. The gum was analysed and found to be different from that which had been applied.

Even then the fraud was not suspected, but when more and more examples of re-gummed stamps came to light, experts were consulted. They declared the stamps perfectly genuine, and the authorities remained mystified until some one suggested taking infra-red photographs.

Then the secret came to light.

Numerous confessions have been obtained from income taxpayers who have admitted the purchase of stamps at half their face value from mysterious hawkers, and one after another of these hawkers have been found and interrogated, but the police have not been able to trace the resold stamps to their original source.

Creation of "super sheep" giving more than ricker wool, has been made possible through gland transplantation, Dr. Serge Verney declared at Grimaldi, Italy.

Whalebone is not bone at all, but an elastic substance found in the mouths of whales.

Johannesburg, South Africa, is to have modern streamline street cars.

## Long-Lived Monarchs

None Have Outlived Throne As Long As Queen Victoria

King George recently attained the 23rd anniversary of his accession to the throne as compared with the nine years' reign of his father Edward VII. Counting from 1854 when the House of Plantagenet was established he is now exceeded in length of occupancy of the throne by twelve others: Queen Victoria, 63 years; George III, 59 years; Henry III, 56 years; Edward III, 50 years; Elizabeth, 44 years; Henry VI, 39 years; Henry VIII, 38 years; Charles II, 36 years; Edward I, 35 years; George II, 33 years; Henry VII, 24 years and Charles I, 24 years.

## Rotating Reserve Plan

U.S. Navy Department Abandons This System

The rotating reserve plan by which Admiral William V. Pratt, chief of naval operations, hoped to save a large sum through keeping one-third of the United States fleet in reserve of the United States fleet in reserve has been abandoned by the navy department because a study shows the plan would cost \$5,000,000.

Secretary Claude Swanson, of the navy, said that only the destroyers and submarines now on a rotating reserve plan would be laid up at any time.

Dickens delighted in ornamenting himself with costly jewelry.

## Palpitation of the Heart Nerves Bad—Could Not Sleep

Mrs. Fred Bingham, Swift Current, Sask., writes: "I was bothered with palpitation of the heart, and my nerves were so bad I could not sleep."

"I was getting desperate and confided my trouble to a friend who recommended me to use Milburn's Heart and Nerve Pills. I purchased a box and got such relief I will gladly recommend them to all who are troubled as I was."

## National Research Council Reports On Relative Value Of Various Feeds For Livestock

The pressure of the disastrously low prices of grain now being experienced has driven many members of the farming community to seek more profitable returns, by feeding their produce on the farm and marketing it in the form of livestock. This in turn has caused increased interest in the relative utility and value of the different grains for various classes of farm animals. The information contained in the recently published Report No. 25 of the National Research Council "The Comparative Feeding Values for Livestock of Barley, Oats, Wheat, Rye and Corn" should therefore be of considerable practical value to farmers and stockmen at this time.

In a foreword to the Report Dr. R. Newton, Director of the Division of Biology and Agriculture of the National Research Council, states that the lack of authoritative published information on this question, and the desirability of summarizing the results of feeding experiments, particularly with regard to barley, a home-grown product, and corn, a product largely imported, was brought to the attention of the Associate Committee on Grain Research of the Council by officials of the wheat pools. Having ascertained that Professor E. W. Crampton of MacDonnell College had already begun some work along this line, the Council made a grant to assist him in reviewing all the modern published literature conveniently available on the comparative value of barley, oats, wheat, rye and corn for feeding horses, cattle, sheep and swine. In this Report Professor Crampton makes available the results of his inquiry.

For the purpose of his survey Professor Crampton has consulted 350 published accounts of feeding experiments conducted in 77 provinces of Canada, 29 States of the Union, and 8 overseas countries. Whenever possible quantitative data respecting gains and feed consumption have been extracted from these accounts and tabulated according to the grain comparison and class of stock involved. It has thus been possible to arrive at average figures for rates of gain, gain per 100 lbs. feed eaten and other measures of efficiency, representing the combined experience of numerous different investigators. A statistical method has been employed to test the significance of all observed differences between the grains compared.

An encouraging feature of the findings is the indication obtained that in general the Canadian feeder is not handicapped by the lack of choice for fattening steers. Wheat actually appears to be more efficient than corn for hog fattening. The other grains however, suffer somewhat by comparison with corn in this connection, and for sheep fattening all, including wheat, appear to be inferior to corn. In general the difference in efficiency seem to be roughly proportional to the amounts of fibre contained in the various feeds. Special characteristics, particularly in the case of rye, also limit to determine the usefulness of the several grains for special purposes or for certain feeding classes. The value of the Report to investigators is increased by a section in which Professor Crampton discusses the planning and reporting of stock-feeding experiments in the light of the lessons to be learned from the numerous trials examined in the course of this study.

A comprehensive summary of the findings which are discussed in detail in the body of the report is provided. Whilst it is anticipated that the report as a whole will probably be of interest mainly to investigators, this summary (which is being reprinted separately) contains in brief form much information of value and interest to practical stock men.

The report or the summary may be obtained upon application to the National Research Council or the Federal Department of Agriculture, Ottawa.

W. N. U. 1897

### Transportation By Air

#### Aeroplane Makes Possible Industrial Development In Remote Areas

It is now about seven years since aircraft of a type which could be considered at all efficient were made available in Canada for the transportation of equipment and supplies into the mining areas.

Since 1926—the year of the Red Lake rush—a steadily increasing use of aircraft has resulted in yearly augmented totals of mileage hours flown and freight carried.

Despite the fact that the eastern inter-city and prairie air mail services were discontinued in March, 1932, a comparison of the yearly totals for 1931 and 1932 shows that Canadian Airways alone carried nearly 50 per cent. more freight and express during the latter year and more passengers despite the fever hours and mileage flown.

This increase is largely accounted for by the activity in the Great Bear area and whatever the future of Great Bear may be, it has at least served one purpose well—demonstrating to the public that provided the facilities afforded by aerial transportation are available, no part of this Dominion is too remote for industrial development. (W. B. Burchall in the Financial Post.)

### Would Honor Captain Bernier

#### Parliament Likely To Recognize Services Of Veteran Arctic Explorer

In the Senate recently the Hon. J. P. B. Cegrean made the proposal, which was promptly endorsed by the Government leader, the Rt. Hon. Arthur Meighen, that Parliament should make suitable recognition of the services performed by Captain J. E. Bernier, the veteran Arctic explorer, who has contributed largely to the knowledge possessed by Canadians of the value and extent of their Arctic resources. Captain Bernier is now in his 82nd year, old as far as age is counted but still as interested as ever in the Canadian Arctic and its resources. He went to sea for the first time when only twelve years of age and he continued to sail as long as health permitted, for many years with the Arctic regions as his destination. Important public service was rendered by him in the course of his periodical voyages into northern waters, sometimes with the object of formally taking possession of certain lands in the name of the Dominion, and at one time he planned an independent Canadian expedition for the discovery of the North Pole. There are very few people who know as much about the Canadian Arctic regions as Captain Bernier.

By Ruth Rogers

### NONSENSICAL LITTLE BITS OF LINGERIE THAT COUNT SO MUCH FOR SHARPNESS

They are so flattering! What grand time you can have making one or all of these "bits" of lingerie for your spring wear. It is such dainty interesting sewing you can do in your spare evenings. They require the minimum of material, and cost you next to nothing.

Organdie, pique, net, lace and crepe silk are popularly used. Style No. 681 includes the four different types and is designed in one size only. Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

### How To Order Patterns

Magistrate—Why did you bite your husband's mother?

Culprit—"Twice 'is' fault, your worship. 'E was always throwin' 'er in my teeth."

About 500,000,000 pounds of cocoa are grown annually in the Gold Coast territory of Africa.

## Joint Commission On Conservation and Afforestation Hold Meeting at Regina

The Joint Commission on Conservation and Afforestation of the prairie provinces of Canada, held its inaugural meeting in the Parliament Buildings recently in Regina.

There were present the following members of the Provincial Commissions on Conservation and Afforestation: Representing Saskatchewan—Hon. James F. Bryant, W. D. Cowan, M.D., M.P., Professor C. J. MacKenzie, Dean of Engineering of the University of Saskatchewan and T. A. Patrick, M.D., Yorkton. Representing Alberta—Hon. R. G. Reid, Provincial Treasurer and Minister of Natural Resources for Alberta. Representing Manitoba—C. H. Attwood, Deputy Minister of Natural Resources and Industries, Col. H. J. Stephenson, Provincial Forester and Professor J. H. Ellis, Professor of Soils, Agronomy Department, University of Manitoba.

It was agreed to establish a Joint Manitoba - Saskatchewan - Alberta Commission, with the provincial committees collaborating under one chairman. It was distinctly understood that the joint committee functions in the matter of assembling and acquiring data in a co-operative way only and does not bind the respective provinces to any individual action but exists only for the purpose of making recommendations.

Hon. James W. Bryant, Chairman of the Saskatchewan Commission was elected chairman of the joint commission. The Commission then drew up an agenda and discussed the following matters in relation to the work to be undertaken:

1. Climate. 2. Afforestation. 3. Conservation, under the following heads: (a) Water; (b) Forests; (c) Soils; (d) Scenic beauties; (e) Game; (f) Fish; (g) Bird life; (h) Fur bearing animals. 4. Drought problems and how to meet them.

The following programme was adopted as the aims and objects of the joint Commission.

Aims—1. To institute a scientific research of climatic conditions in the prairie provinces.

2. To apply the results of said research to the problems facing each community in the western provinces with particular reference to provincial administration with respect to industrial development, as it relates to agriculture, forestry, game, fur-bearing, fisheries, land settlement and water resources.

The objects of the joint commissions work are: (a) Conservation of water; (b) Prevention of erosion and soil drifting; (c) Soil survey and land utilization studies; (d) Shelter belts, location and types; (e) Research for forestry purposes all areas unsuited for agricultural purposes; (f) Forestation of areas

unsuited for agricultural purposes; (g) Conservation of forests and thereby providing shelter and preservation of game, fur bearers, recreational areas and industries depending on the forests and forest products.

Stress was laid on the importance of the soil surveys in relation to settlement, and also in particular with regard to the type of tree species to be recommended for each locality.

The joint commission made several recommendations which were passed on to the provincial commissions for study and experimentation, among them the removal of different species of trees on sandy soils where the water table was low and also species of trees for soils where the water table was high and drainage good.

The following among other resolutions were passed:

"That areas which are not suitable for agricultural purposes be withdrawn from settlement and reserved for forestry purposes, and that the several provincial Commissions be urged to study the feasibility of reforestation of such areas as seems suitable, attention being especially called to the desirability of planting or continuing in forests the headwaters of all streams."

"That this joint Commission on Conservation and Afforestation desires to place on record its appreciation of the splendid work carried on by the forestry staff under the Federal Government. The Commission recognizes with appreciation the leadership in the matter of tree planting in the prairie provinces given by Norman M. Ross, of Indian Head, Chief of the Forestry work in Western Canada. The joint Commission also desires to express appreciation of the splendid educational work in the matter of tree planting being done by the Canadian Forestry Association through their tree planting car."

"That this joint Commission appreciates the co-operative effort in the matter of soil survey between the Dominion and the provinces and wishes that this work be continued and extended as much as possible."

The following joint sub-committees were formed to study, assemble and exchange information on the following subjects:

Committee on Soils—Professor J. H. Ellis (Manitoba), Professor J. C. MacKenzie (Saskatchewan), and Professor F. A. Wyatt (Alberta).

Committee on Forests—Hon. James F. Bryant (Saskatchewan), Col. H. J. Stephenson (Manitoba), and T. F. Blegen (Alberta).

Committee on Water—Dean C. J. MacKenzie (Saskatchewan), C. H. Attwood (Manitoba), and Dr. Rutherford (University of Alberta).

It was agreed that as work was carried on and results obtained, all data should be made available to the central Committee so that the provincial Commissions can keep in touch with one another and obtain all data available.

### Some Truth In It

European Women Old-Fashioned and Therefore May Be Better Off

Miss Andros Collin, one of the few women executives on the League of Nations staff, believes her European sisters are better off than United States women because they are old-fashioned. "Because women in Europe have kept so very much to the old-fashioned woman's way of life they are much less affected by current economic conditions than your women here," she said. "The average woman of Europe looks to getting married as a goal in life, not to finding jobs and careers. I do not find young mothers for office workers. One of two things suffer, the home or the job."

Register office marriages are more popular in England each year, there being 100,000 such unions last year.

It takes sap from two or three maple trees to make a gallon of syrup.

### CANADIANS HONORED AT MCGILL CONVOCATION

A number of prominent Canadians were honored at the McGill Convocation by the conferring of degrees. Perhaps the most prominent recipient was His Eminence Cardinal Villeneuve, Roman Catholic Archbishop of Quebec, who is shown above with a number of prominent personages at McGill University. Front row, left to right: Bishop Farthing, Anglican Bishop of Montreal; His Eminence Cardinal Villeneuve, and Senator Hon. A. J. Brown. Second row, in mortar boards, E. W. Beatty, President of the Canadian Pacific Railway, who is Chancellor of the University; Sir Arthur W. Currie, and his left in gown, Mr. John Ross, Back row, Col. Herbert Molson, W. A. Black, Hon. Vincent Massey, who also received the degree of Doctor of Laws, and Mr. Henry Birks. In the doorway is Mr. Huntley Drummond.

### Consolidating Tax Arrears.

For the purpose of encouraging  
property owners to liquidate any  
arrears of taxes and also to give  
better opportunity to those whose  
lands may have passed under the  
Tax Recovery Act, to regain title or  
at least protect their property from  
sale, the provisions of the new Tax  
Consolidation Act, passed at the  
last session of the legislature, have  
now been brought into effect and  
may be taken advantage of. The act  
provides for arrears of taxes of more  
than a year's standing, as at the  
beginning of 1933, to be consolidated,  
and payments made in six annual  
instalments, each to be paid not  
later than December 15th in each  
year. The first instalment is to be  
10 per cent of consolidated arrears;  
the second instalment 10 per cent;  
the third 15 per cent; the fourth  
20 per cent; the fifth 20 per cent;  
and the sixth 25 per cent. Those  
wishing to avail themselves of the  
advantages of the act must apply in  
writing to the municipality before  
October 1st. Owners of land whose  
taxes were consolidated under the  
acts of 1931 and 1932, may come  
under the new agreement by making  
application up to October 15th.  
The instalments collected under  
the new system will be reported among  
the various taxing authorities involved.  
The new act provides also for  
certain discounts on the payments of  
instalments of arrears as follows:  
arrears of 6 years and more, 26 per  
cent; 5 years 22 per cent; 4 years  
18 per cent; 3 years 14 per cent;  
and 2 years 9 per cent. These dis-  
counts will be computed, not on  
the total amount of the consolidation  
but separately on each class of tax  
involved. That is, if the portion of  
the consolidated amount which is  
due on supplementary revenue is in  
arrears for 6 years, then the 26 per  
cent discount applies, but if that  
portion of the total which applies to  
another class of tax is in arrears for  
only 4 years, then it would receive  
only 18 per cent discount, and so  
forth. The act also assists those  
whose property is at present under  
the tax recovery act, by permitting  
them also to make an agreement to  
pay up arrears under the new act,  
and on completion of all the require-  
ments of the agreement, regain title  
to their lands. This applies to own-  
ers of 2 acres and more. A special  
additional discount of 4 per cent, is  
allowed those who can pay the entire  
consolidated sum in one payment,  
this discount being computed on the  
net amount of arrears due, after the  
other discounts have been deducted.

### Dairy Herd Testing in Alberta.

Value of the cow-testing service  
carried out by the federal department  
of agriculture, and in which some  
cooperation is given by the provin-  
cial department, has been attested  
to on numerous occasions. A recent  
survey shows that Alberta has 29  
cow-testing associations, involving  
422 herds and 5,708 cows, of which  
3,184 averaged 7,275 lbs. milk and  
274.28 lbs. butterfat, with a test of  
3.77 per cent; 1,082 cows produced  
and 92 herds averaged over 300 lbs.  
butterfat per cow this year.

### Alberta's Game Birds Facing Ideal Season

The outlook for game birds in this  
district was promising and an in-  
crease had been noted in the number  
of waterfowl, Dan Patton, well  
known Midnapore naturalist stated.

More ducks were nesting in this  
part of the province than last year,  
which would indicate a general in-  
crease, though it was difficult to  
judge from local conditions what  
might prevail generally. Mr. Patton  
said. With the large quantities of  
moisture which had fallen this  
spring, conditions were ideal for  
ducks.

Hungarian partridges and prairie  
chickens were faring well despite the  
heavy spring snowfalls, he contin-  
ued. Many partridge nests had  
been destroyed by the big storm,  
but the birds had built new ones  
and no real harm had resulted.

Crows and magpies were thick  
and Mr. Patton stated that now was  
the best time for killing them. These  
pests were nesting and would  
return to their eggs shortly after  
being frightened away he explained.

### Here and There

Gasoline sold in Canada during  
1932, according to figures compiled  
by the Dominion Bureau of  
Statistics, amounted to 603,522,999  
gallons. Nearly half the total was  
consumed in the Province of  
Ontario.

The recent Canadian census re-  
veals that of the population of  
Canada fifty-two per cent are of  
British origin; twenty-eight per  
cent, French origin; seventeen  
per cent five per cent all other Eu-  
ropean races, and about four-  
fifths of one per cent, Asiatic.

The Saskatchewan Department  
of Natural Resources will liber-  
ate about 2,000 one-week-old  
pheasants throughout the province  
of Saskatchewan during the  
coming summer. The birds are  
being held in captivity at Moose  
Lake prior to liberation.

Despite a somewhat later sea-  
son this year, crop conditions  
throughout the Prairie Provinces  
provide cause for optimism in the  
estimates of E. M. McKay, general  
agricultural agent, Canadian Pa-  
cific Railway. He based his view  
on improved moisture conditions  
and generous growth everywhere,  
which at some points was the best  
since 1925.

Completing a seasonably suc-  
cessful visit to Canada and the  
United States lasting several  
months, the Oxford Group sailed  
recently aboard the Empress of  
Australia for England under the  
leadership of Rev. H. Allen Viney.  
Their Canadian visit terminated  
with a house party at the Chateau  
Frontenac at which 500 members  
were present.

The death of Vancouver recent-  
ly of F. W. Peters, general super-  
intendent British Columbia  
district, Canadian Pacific Rail-  
way, severed one of the last re-  
maining links on this continent  
of the pioneering railroad days  
of the early seventies. His ac-  
tive life extended to nearly 52 years.  
He was born in Saint John, March  
25, 1850.

Grant Hall, senior, vice-presi-  
dent, Canadian Pacific Railway,  
back from three-weeks' inspec-  
tion trip that took him to the  
Pacific Coast, stated that he had  
seen and heard much of an en-  
couraging character during his  
trip and nothing of a contrary na-  
ture. He added that there was  
distinct revival of hope and res-  
toration of confidence.

Farm management through the  
application of business principles,  
practical and theoretical knowl-  
edge and ordinary horse sense to  
farm problems is a necessity of  
this day of lowered prices, T. C.  
P. Herzer, manager Canada Col-  
onization Association, told the  
Winnipeg Kiwanis at the Royal  
Alexandra Hotel, recently. The  
Association has extended its ac-  
tivities in Saskatchewan, where it  
now has 14 zone managers with  
1,344 farms of a total of 407,550  
acres under supervision.

More than 300 scientists from 31  
countries attended the 11th meet-  
ing of the Pacific Science Con-  
gress opened at the Empress  
Hotel, Victoria, June 1, and con-  
tinuing at the Vancouver Hotel,  
Vancouver, until June 14. It was  
the first time the Congress has  
met on the American side of the  
Pacific Ocean. Lord Rutherford  
addressed the Congress from his  
home in England, his speech be-  
ing carried by radio close on  
6,000 miles to Vancouver.

### Increase in Homesteads.

Opening of new areas for homestead purposes has led to a considerable increase in granting homestead rights recently, according to a report of the provincial lands department. During the month of May a total of 332 homestead entries were made, of which 284 were first entries and 45 second entries. A total of 81 entries were made by women seeking homestead lands. In April of this year total entries were 156 and in May 1932 the total was 297.

### Rural Finances in Good Shape.

Rural municipal finance in Alberta, all conditions and depressions to the contrary notwithstanding, is in a gratifyingly healthy state, according to Hon. R. G. Reid, minister of municipal affairs, who has been looking into the general record of rural municipalities for the last calendar year and the first half of this year. A reduction of fully 50 per cent. in liabilities of municipal districts is shown. Collections have been maintained to a surprisingly marked degree. Less than \$18,000 was the total bonded indebtedness of rural municipalities as at Dec. 31 last. Outstanding bank loans were about \$500,000 with ample security by way of uncollected taxes and other realizable assets. Revenues collectable by the department of municipal affairs for the fiscal year ended March 31st 1932 exceeded the estimated receipts for that year and also for the year before, while there was a saving in departmental expenditure of some \$10,000.

### Wealthy Municipality.

The municipal district of Sifton is without doubt one of the wealthiest districts in Alberta. It has a credit balance at the bank of \$23,500 and has decided to purchase \$10,000 worth of provincial government savings certificates instead of keeping the money in the savings bank.

### Reopen Fernie Mines.

Through the efforts of Hon. H. H. Stevens, minister of trade and commerce, and the co-operation of D. C. Coleman, vice-president of western lines of the C.P.R. and officials of the Crow's Nest Pass Coal Co., an agreement to reopen the mines was arrived at.

After a complete and exhaustive study of the situation Mr. Coleman agreed to provide a substantial order which, together with new business, which it was disclosed was available from other sources, would create a background of approximately 100,000 tons a year, and the coal company representative agreeing to these conditions, operations will shortly be resumed again at Coal Creek, giving work to at least a portion of the population of Fernie.

### New Airports for Alberta.

Two new airports, to be built as part of the unemployed relief program of the province, will be proceeded with shortly. The most important will be a seaplane base at Cooking Lake, east of Edmonton, built as a joint civil-provincial project, the province purchasing the necessary land and the city of Edmonton to operate the port as an extension of its large airport in the city. The construction of this port will mean a transference of a large proportion of the air travel of the northland from Fort McMurray to Edmonton, as at present the passengers from the north must come to the capital city by train from Fort McMurray. Another airport is to be built at Coleman with unemployed labor. About 150 men will be employed at Cooking Lake, and the same at Coleman, under direction of the provincial relief commission.

### CARD OF THANKS

We wish to thank our many friends and neighbors for their kindness and sympathy during our recent sad bereavement. Also for the floral tributes.  
Mrs. Frank Jahoke and Family.

### Why Do Men Advertise?

The man who conducts his business on the theory that it doesn't pay and he can't afford to advertise, sets up his judgment in opposition to that of all the best business men in the world. Says an experienced advertising authority: "With but a few years' experience in conducting a small business on a few thousands of capital, he assumes to know more than thousands whose hourly transactions aggregate more than his in a year, and who have made their millions by pursuing a course he says 'doesn't pay.'"

If advertising doesn't pay, why is it that the most successful merchants of every town, large or small, are the heaviest advertisers? If advertising doesn't pay, who does the most business? If it did not pay, business firms the world over would not spend millions that way. Is it because they want to donate these millions to newspaper and magazine publishers, or is it because they don't know as much about business as the "six-for-a-dollar" merchant who says that money spent in advertising is thrown away or donated to the person to whom it is paid? Such talk is simply ridiculous and it requires more than the average patience to discuss the proposition of whether advertising pays or not with that kind of a man. His complacent self-conceit in assuming that he knows more than the whole world is laughable and reminds us of the man who proved that the world did not revolve, by placing a pumpkin on a stump and watching it all night.—Ex.

WORLD HAPPENINGS  
BRIEFLY TOLD

The Bank of England recently bought £342,200 in bar gold.

Flying time of the London-Cape Town air mail has been cut from 11 to 10 days for the 8,000-mile trip.

Proclamation has been issued by the Dominion government extending the Canada-New Zealand trade agreement for six months from May 24.

Forty-three cases of material for the national exhibit of the kingdom of Siam at the forthcoming World's Grain Show, has reached Regina.

The Manitoba Government is richer by \$2,945, which was realized in the auction of hay cutting privileges on crown marsh lands of the Red River delta north of Selkirk.

Allan C. Fraser, of Calgary, has taken over his new duties in Ottawa as managing secretary of the National Dairy Council of Canada. Mr. Fraser succeeds W. F. Stephens.

The Germans broke all records for air mail from Europe when the Graf Zeppelin's mail was delivered at Buenos Aires four and one-half days after it had left Friedrichshafen, Germany.

After an absence of three years, liquor advertising is to be permitted in Manitoba. The Manitoba government liquor control commission has rescinded the order banning liquor advertisements. It was announced.

Unless outside interests decide to get out of commercial fishing in the Churchill waters this summer, no catches will be made this year, according to fishermen at The Pas, Man.

Any German deserting to visit Austria must pay 1,000 marks (\$270) for a visa hereafter. This is a retaliation by the Hitler Government for repressive measures against Nazis in Austria.

## A Simple Resuscitator

Double Can Device Rocks Patient and Restores Breathing

A simple resuscitator which creates respiration in newly born babies and restores breathing to adults by the simple process of rocking the patient in a double can device has been developed at the Shreveport Charity Hospital in Arcadia, Louisiana.

The front end of the double can has a hole and rubber collar to allow the patient's head to protrude. The inner cylinder is an air chamber while the area between the inner and outer can is partly filled with warm water. The upper side of the inner can has a hole that allows passage of air which is increased or decreased by pressure of the water as the can is rocked.

As explained, the air is compressed into the air chamber as the can is rocked upward and the opposite motion causes a partial vacuum. The changing of the air pressure has the same effect upon the chest, as hand pressure systems used by swimming resort lifeguards.

Additional advantages were that the water warms and moistens the air and the blood circulation is stimulated by the rocking.

## Cannot Lower Banner

Religious Sign in Calcutta Paid Well For Protection Of Principles

So that their banner might never be lowered, in accordance with their principles, a religious sect known as the Jains, paid telephone and street car officials of Calcutta, India, \$2,500 to cut off the overhead wires during the recent procession of the faithful. The banner is 60 feet high and always needs their procession, and must never be dipped at any time or any place. The sect traces its religion back to 600 B.C. It has beautiful temples in out-of-the-way mountain spots. The one in Calcutta is famous for its many miracles.

## Might Use Rubber Map

The home service department of a large electrical concern received this note from a woman customer: "I have a pet dog which insists on chewing the electric lamp cords. If he ever bites through a cord and any of the live leads cut, will I get a shock if I snap it up?"

## Bargains in European Tours

Cheap Rates Making It Possible For Many Canadians To Make First Trip To Old Country

(By E. L. Chicoutot)

A great many Canadians who all their lives have thought and talked vaguely of going to Europe some time and who have year by year relegated this expectation to an indefinite future, are this summer realizing their ambitions. This is the conclusion at which one arrives after attending carefully the departures of Canadian liners from Montreal and analyzing the bookings for the season. A surprising number of these who will sail down the St. Lawrence on their way to Europe in the course of the present summer are making their crossing of the Atlantic for the first time.

Despite the continuance of unsettled economic conditions, reduced incomes, and restricted luxury purchasing, the realization has come home forcibly to many people that this is the year to make that European trip if it is ever to be made. Not since the war has it been possible to tour Europe so cheaply. It seems doubtful if after present economic troubles are straightened out it will ever again be possible to do it at such low cost, and so these appreciating the opportunity and able to do so are seizing it. Imagine being able to bid a care-free farewell to this continent for thirty-one entire days, enjoy a luxurious river and ocean voyage, and see all that is loveliest and most interesting in Europe for as little as \$250.50! Thirty-one delightful summer days of tranquil sailing between the romantic, village-dotted shores of the St. Lawrence River and the lovely coast of England, Belgium, Holland and France—at \$6.60 a day.

The amazing feature of the arranged tour, in addition to its economy, is the amount of actual travel and visiting that can be crammed into the limited period of time. Within the space of the month at his disposal, the trans-Atlantic traveller can enjoy a surprising amount of territory and visit virtually all those romantic and historic localities of which he has long dreamed, which he would probably list if he were making a trip on his own account, of indefinite duration. Certainly he returns completely satisfied, with adequate appreciation of the countries he has visited, satisfied that he has spent his time to the best advantage.

For the traveller venturing alone to secure so comprehensive a picture of such satisfaction is possible in the time of his disposal. To him, in twenty days he actually spends in Europe are scarcely more than sufficient to make a commencement on all he would like to do. He does not have to travel over so much more complicated than at home. Left to his own devices with many plans and wants to see he finds himself more or less in a daze, wondering where to go and how to proceed. On every turn he loses precious minutes of his holiday time.

When he goes on an arranged tour things are very different. Apart from the fact that from the start and throughout the trip he has the most competent company in which to travel, the itinerary has been calculated with the most absolute precision so that the places he most wishes to see have been squeezed in without a minute's wastage of time. He steps from the boat upon Europe's soil to find a motor coach waiting for him and thereafter there is one continually in the offing to transport him without delay to the time through the most picturesque and beautiful countryside from one revered spot it has been lifetime's dream to visit to another, which will be a cherished memory for the remainder of his days.

Take, for instance, the 31 day tour of which mention has been made, typical of others which are expanded up to three times its length. The amount and variety of sightseeing crowded into it is at first unbelievable when it is considered that more than one-third of the time must be spent in voyaging to and from Europe. The Canadian visitor making such a trip returns to Canada with a more developed knowledge of England than the average Englishman has, having visited many parts of France unvisited by the majority of French people with a panoramic impression of Holland and Belgium unpossessed by the greater number of the inhabitants of these countries.

A landing is made alternatively at Plymouth, romantic old south of England port, where legend has it Drake imperceptibly continued his game of bowls when informed of the approach of the Spanish Armada, or Liverpool, the great shipping centre on the Mersey River. Then the traveller's eye is fixed on Mecca, London, centre of Europe.

One route takes the comfortable motor coaches through lovely Devonshire, one of England's fairest counties, least touched by modern progress, to Torquay, one of the most attractive of English spas, so sheltered by the sea and the most beautiful vegetation. After a day at this beautiful resort he passes on through Exeter with its lovely Cathedral, Shaftesbury, Wilton, Salisbury with another magnificent cathedral, Stone-

## Working Model Of Elevator

Interesting Feature To Be Shown At World's Grain Show

A feature of the exhibit which the Saskatchewan Wheat Pool is preparing for the World's Grain Show, to be held at Regina in July and August, is a full working model of a modern terminal elevator. This is an attractive miniature of Pool Terminal No. 4 at Port Arthur, which has a total capacity of over 6,500,000 bushels of grain.

The model, painted ivory, consists of workhouse and storage annexes, boiler house, track shed and railway tracks. In addition there will be a model boat—a typical Great Lakes grain carrier—alongside the dock, loading up from the shipping spouts, thereby lending an additional touch of realism to the picture.

This will be an excellent opportunity to learn just what happens to Western Canada's wheat when it enters one of these big terminal elevators for by means of an electrically driven motor the main handling process may be followed with ease. Some of the storage annexes are shown in section to indicate their construction, while a good view may also be obtained of the horizontal and vertical grain conveyors in action. The conveyors are accurately reproduced even to the numerous buckets attached to the belts.

The dimensions of this model terminal are 57 inches by 36 inches, the height of the workhouse being 17 inches and of the annexes, 13 inches.

## Competing For World's Honors

Women Athletes Will Enter British Empire Games In 1934

The biggest gathering of women athletes ever known is to take place in London, England, in 1934. Events for women are to be included in the British Empire games, which take place in August next year, and representatives of every part of the empire will attend.

The women's world games are being held in London in the same month, and it is hoped that most of the British athletes will stay for the international gathering. Mrs. Muriel A. Cornell, secretary of the women's amateur athletic association, said recently: "We expect that from 20 to 25 nations will send women to the world games. Each will send a dozen representatives and more if they wish."

## Went Into Reverse

A stroke of lightning which struck the residence of L. W. King, at Newman Grove, Nebraska, so affected the electric clock in the home of Arnold Widgren a half block away that the hands of the timepiece started going counter-clockwise. That it was fixed some time later, the hands continued their backward course.

Many unemployed men in Aldrie, Scotland, have offered to donate their labor in making a new park and in putting the present ones in good condition.

the progress of the world's material affairs they can more easily take time than they could in the hectic days before 1930, or than they will be able to do when adjustments to conditions under way are concluded and the wheels of industry resume their normal turning and grinding.

That is why one hears of so many Canadians making their first trip to Europe this summer. They are real economists—these happy individuals one sees climbing the gang plank of each Canadian majestic liner about to depart from Montreal,—who gaily wave farewells from the rail as the great strains at the harbor and the vessel recedes into the river. They are spending their money and spending it wisely, getting the fullest possible return in travel pleasure.

## Daily Broadcasting Service

Radio Commission Acquires Powerful Station At Toronto

With the acquisition on lease from Gooderham and Worts, Limited, of broadcasting station CKWG in Toronto, the Canadian radio broadcasting commission has virtually completed arrangements for inaugurating a regular daily broadcasting service of a national character for radio listeners throughout Canada. The announcement was made by the commission recently. At the outset, this service will extend over a period of at least three hours during the best broadcasting part of the day.

The commission has leased station CKWG for a term of years and will operate it under commission management, the announcement stated.

The commission is placing Charles Shearer, well known Toronto radio man, in charge of this station as manager.

Broadcasting stations at Moncton, Ottawa, Toronto and Vancouver will now be operated by the commission itself, the announcement continued. To ensure the regular distribution of its national broadcasting service from other stations from coast to coast, the commission has purchased broadcasting time from principal stations throughout Canada for the programs. It has at the same time leased trans-Canada transmission wires for carrying its programmes from the place of origin to the broadcasting stations in all the principal cities.

CKWG for a term is now engaged in arranging for and creating Canadian programmes of a distinctive character. These programmes will be created in the various centres of Canada.

The name of the Toronto station will be changed to CKRT, the letters designating it as the commission's station in Toronto.

Actor—"Yes, my friend, usually my audiences are glad to their seats."

Friend—"What a quaint way of keeping them there!"

It is foolish to sit npt the cultivation of fire-stick by giving your friends an occasional dig.

Air insurance rates in Europe are dropping.

Demand for homes in Sydney, Australia, is greater than the supply.

**Calgary Exhibition And Stampede, July 10th to 15th**

Those planning on attending the Calgary exhibition and stampede, July 10th to 15th, may be assured that this year's show will be one of the most interesting ever held in Calgary. The exhibition will again bring together an excellent display of livestock and the buildings will be filled to capacity with domestic, industrial and Government exhibits.

Chief Smart, chairman of the stampede parade committee, feels confident that it will be the best parade ever held, and as usual it will start at 10 o'clock on the Monday morning.

Everything points to the stampede committee having a tremendous success this year. The judges and officials are as follows: Judges: Jas. Mitchell, Medicine Hat; Bob Carry, Black Diamond, and Emory LeGrandeur, Hussar. Starter: Alex Fleming, High River. Tie Judges: J. W. McNeil, Medicine Hat; Chute Dignam, Thos. Lawson, Hussar. In charge of arena: J. M. Dillon, Calgary. In charge of stock: Ray Knight, Raymond, Dick Coggrave, Wayne. Chief Clerk, stampede office: Leroy Chown. Mr. Jas. H. Cross, who is a director and chairman of the stampede committee, giving his time in an entirely honorary capacity, is devoting a great deal of attention to the stampede and is receiving the warmest co-operation.

The stamping races will commence Saturday July 28th and continue during the exhibition week.

The feature attraction in front of the grandstand in the evenings will be "The Bird of Paradise," a gorgeous production including 100 artists, the program opening with the famous chuck wagon race.

The Cowboy and Oldtimers' Ball on the Friday evening will again be the scene of much fun and merriment. Indians will parade uptown in the morning and will take part in the Saturday evening program, when the stampede champions will receive their prizes and the week's celebrations will close with a mammoth fireworks display on the Saturday night.

The change of admission to the grounds has been cut in two, and the special passenger fares (lowest ever in force) will assist in providing a large attendance. Intending patrons are urged to inquire for the special rates. A free accommodation booth will be located in front of the C.P.R. station.

**WEEKLY JOKE**

A brass band once visited a small village and the people were delighted with it, but they could not make head nor tail of the trombone, so they sent for old Poley Hoskins, who claimed he understood music. Old Poley watched the performance of the trombone player for some time. Then he said with a sneer:

"Take no notice of him, fellows, there's a trick in it, he don't swallow it every time."

**WEEKLY SERMONETTE**

If trouble hands his jolts to you,  
Don't quit, be game.  
There is no easy road  
To wealth or fame.  
Get up smiling and then say  
When you're knocked flat:  
"Old Trouble scared again,  
But I expected that."  
Laugh—that he's growing  
And yelling "Enough!"  
—Just shake your fist at Trouble—  
"That's the stuff!"
